Substance of Interview
 (For each issue discussed, provide a detailed description and indicate if agreement was reached. Some topics may include: identification or clarification of a reference or a portion thereof, claim interpretation, proposed amendments, arguments of any applied references etc...)

The Examiner informed Applicants' representative that formal drawings are required and must be filed to address previous drawing objections not complied with. A review of the prior drawing replacement for Figure 9 was found to be acceptable and the entry of these has been permitted after discussing these with Applicants' representative. Applicant's representative explained the support for the changes to the drawing and to the specification were based on the drawing figure 9 and how it was being defined. The Examiner stated the amendment to the specification submitted on 8/12/08 is now entered. Additionally the Examiner discussed a double patenting rejection made in a prior office action in which an alleged Terminal Disclaimer filed was misplaced and not found in the record. Applicants' representative confirmed this and requested the Examiner to review the pending claims and patented claims to see if one would still be required. The Examiner informed Applicants' representative that the scope of the claims were not the same and the '720 patent did not claim the cell configuration of the pending claims. Thus, a terminal disclaimer would not need to be filed over the '720 patent alone. Additionally discussed was some details describing figures in the specification in which Applicants' representative authorized the Examiner's amendment to correct some minor formalities.

Applicant recordation instructions: It is not necessary for applicant to provide a separate record of the substance of interview.
